*Preteen seminars and books teach the science of puberty for their single gender including the physical, emotional, social and spiritual changes and the virtues to develop during these years of growing up.*

*Adolescent seminars and books review the puberty information of both genders, and teach about the marriage act, conception, fetal development and chastity, along with the virtues.*

*Parent Seminar and book offers confidence and practical suggestions for the 'teachable moments' in life for parents of each age group of children 2-14 years old, and can include a preview of the other videos.*

Along with the Facilitator Guide, the five family LoveEd books and free streaming videos, your parish will have all it needs to present these five seminars.
